Review

2. The WHERE clause's purpose is to ensure certain criteria are met.

- (=, comparisons, NULL, IN(), LIKE, AND/OR, etc.)

4. A column that isn't physically stored in the table

- It commutes its values from an expression
- Followed by the word AS

5. TRUE if the operand matches a pattern

6. Allows you to specify multiple values in a WHERE clause

17. You could miss some zip codes that start with 7,8, or 9 because of the range of SMALLINT

- It isn't long enough, anything above 65,535 won't be included.

18. The following command of DELTE, FROM ORDER LINE will not work. You need to use the DROP TABLE, ORDER LINE.

BITS 1)

143 Hershey, Jarrod

299 Two Crafty Cousins

322 'Prichards Pizza & Pasta
